Forecast for Friday 05 Jul 2024

Weather: Patchy low cloud at the start of the day, mainly for southeastern parts of the Park, skies gradually clearing through the morning from the northwest. High cloud is expected to move in from the west during the afternoon, with sunshine turning rather hazy. Cloud thickening into the late evening, perhaps bringing a spot of rain around sunset in the southeast.

Chance of cloud-free hill tops above 800m: 30% around dawn, but soon becoming 100% through the morning.

Low Cloud and visibility: Cloud covering hills above 500m at the start of the day, clearing from the northwest, with clear skies forming. High cloud during the afternoon comfortably above summits. Visibility generally very good to excellent during the day.

Valley	11/9	12/10	13/11	14/13	13/12	11/11	11/10
Freezing Level*	1500m	1400m	1500m	1500m	1600m	1700m	1600m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

High UV levels are forecast, so sun protection is recommended. Whilst sunny for much of the day it will still be feeling rather chilly on the summits, so packing extra layers would be wise.

Forecast for Saturday 06 Jul 2024

Weather: Overnight cloud and heavy rain will clear slowly on Saturday morning, however there is some uncertainty in the northern extent of this. Sunny spells and blustery showers then expected through the day, these heavy and possibly thundery at times. Showers easing during the evening.

Maximum wind: Westerly 15-20mph, with gusts 30-35mph.

Chance of cloud-free hill tops above 800m: 70% through early morning, then >95% after.

Low Cloud and visibility: Overnight and in the morning sees extensive cloud covering hills above 400-500m, this slowly lifting as heavy rain clears east. Cloud bases then largely staying above summits through the day, however heavy showers could see cloud temporarily shrouding some higher peaks at times. Poor visibility at first, improving as the rain clears to see generally very good, falling to very poor in heavy showers.

Temperature: **Valleys:** Plus 10 Celsius, rising to 14 Celsius.
At 800m: Plus 4 Celsius, rising to 6 Celsius.
Freezing level: Above summits.
